PROFILE

Data-driven MSc Management student at UCL with a B. Tech in IT (GPA 8.71/10) and a year of government-sector analyst experience. I clean, query and analyse large datasets with Python and SQL, build dashboards and KPI reports in Power BI and Excel, and translate findings into clear recommendations for non-technical stakeholders. Targeting Graduate Data Analyst and Business Analyst roles in London from September 2026. Eligible for the UK Graduate Route — full-time work, no employer sponsorship required.

KEY SKILLS

Data & Programming: Python (Pandas, NumPy, Matplotlib), SQL (joins, CTEs, window functions), data cleaning & wrangling, exploratory data analysis, RFM segmentation

Visualisation & Reporting: Power BI (DAX, dashboards), Excel (pivot tables, dashboards, modelling), KPI reporting, data visualisation, executive summaries

Analytics & Modelling: Statistical analysis & inference, regression, decision-tree modelling, Monte Carlo simulation, sensitivity analysis, A/B-style comparison

Business & Communication: Requirements gathering, stakeholder management, process mapping, business reporting, attention to detail, problem-solving

EXPERIENCE

IT Division Intern - Telecommunication Engineering Centre, Ministry of Comm., Govt. of India (Apr 2023 – Mar 2024)

- Analysed technical and regulatory data across 6+ concurrent certification reviews and produced structured reports that enabled senior-level sign-off decisions, improving traceability and review consistency.
- Consolidated inputs from 4+ cross-functional teams into clear briefings and tracked multi-workstream timelines — strengthening stakeholder communication, requirements gathering and attention to detail.
- Translated complex findings across 6G, IoT and cloud workstreams into accessible summaries for non-technical decision-makers.

DATA PROJECTS

UK E-Commerce Customer & Revenue Analysis — Python, Pandas, SQL, Excel

- Analysed 500,000+ transactions with RFM segmentation and identified that the top 5% of customers generated 40%+ of revenue; delivered three prioritised retention recommendations in a consulting-style memo. [View on GitHub](#)
- Built the analytical dataset from raw data (missing IDs, returns, date errors) and produced an Excel KPI dashboard for non-technical stakeholders.

Decision & Risk Analysis Case Portfolio (UCL, graded) — Excel, decision trees, Monte Carlo simulation

- Modelled optimal decisions under uncertainty across three business cases using probability analysis and sensitivity testing and converted model outputs into structured executive recommendations.

EDUCATION

MSc Management — University College London (UCL)

(Sep 2025 – Sep 2026)

Relevant modules: Decision & Risk Analysis, Statistics for Business Research, Markets & Customers, Operations & Technology Management, Managing Finance.

B. Tech, Information Technology — GPA 8.71/10 — Guru Gobind Singh Indraprastha University (Jul 2019 – Jul 2023)

Relevant modules: Database Management Systems, Data Structures & Algorithms, Software Engineering, Computer Network.

ADDITIONAL INFORMATION

Right to work: Eligible for the UK Graduate Route from September 2026 - 2 years full-time work, no sponsorship required.

Certifications:

- Full Stack Web Development** (HTML, CSS, JavaScript).
- JPMorgan Chase & Co. Quantitative Research Virtual Experience Program on Forage** – (June 2026)
Completed a simulation focused on quantitative research methods. Analysed a book of loans to estimate a customer's probability of default. Used dynamic programming to convert FICO scores into categorical data to predict defaults.
- Quantium Data Analytics Job Simulation on Forage** – (June 2026)
Completed retail analytics project using transaction and customer data; performed data cleaning, customer segmentation, sales trend analysis, trial store uplift testing, control store comparison, data visualisation, and commercial recommendation development for a chips category review.
- BCG X Data Science Job Simulation, Forage** – (Jun 2026)
Completed a customer churn analytics simulation using Python, Pandas and NumPy; performed EDA, feature engineering, Random Forest modelling, model evaluation, feature-importance analysis and executive insight synthesis to support SME customer-retention strategy.

Languages: English (fluent), Hindi (native).
